the problems that the nachlass poses for scholars suggests that the nachlass material should not be held in the same regard as the works nietzsche authorized for publication because of the discrepancy between the published and unpublished writings will to power should not be interpreted as a metaphysical principle operating behind the world since the metaphysical sounding passages are located in the nachlass but rather as a tool for interpreting relations especially human relations within the world the final chapter examines nietzsche s unique style of writing which the author calls mirror writing mirror writing is a technique nietzsche deliberately employs in order to have such visionary themes as will to power master morality and eternal recurrence reflect the reader s values back to himself since this book is meant to be an introduction to will to power at the end of each chapter is a list of additional books so that the reader can delve further into the themes presented in the chapter such as nietzsche s biography ethics writings on truth and eternal recurrence

an introduction to literary theory unlike any other ten lessons in theory engages its readers with three fundamental premises the first premise is that a genuinely productive understanding of theory depends upon a considerably more sustained encounter with the foundational writings of hegel marx nietzsche and freud than any reader is likely to get from the introductions to theory that are currently available the second premise involves what fredric jameson describes as the conviction that of all the writing called theoretical lacan s is the richest entertaining this conviction the book pays more and more careful attention to the richness of lacan s writing than does any other introduction to literary theory the third and most distinctive premise of the book is that literary theory isn t simply theory about literature but that theory fundamentally is literature after all ten lessons in theory argues and even demonstrates that theoretical writing is nothing if not a specific genre of creative writing a particular way of engaging in the art of the sentence the art of making sentences that make trouble sentences that make or desire to make radical changes in the very fabric of social reality as its title indicates the book proceeds in the form of ten lessons each based on an axiomatic sentence selected from the canon of theoretical writing each lesson works by creatively unpacking its featured sentence and exploring the sentence s conditions of possibility and most radical implications in the course of exploring the conditions and consequences of these troubling sentences the ten lessons work and play together to articulate the most basic assumptions and motivations supporting theoretical writing from its earliest stirrings to its most current turbulences provided in each lesson is a working glossary specific critical keywords are boldfaced on their first appearance and defined either in the text or in a footnote but while each lesson constitutes a precise explication of the working terms and core tenets of theoretical writing each also attempts to exemplify theory as a practice of creativity foucault in itself

teach yourself nietzsche is a comprehensive guide to one of the most influential and controversial philosophers of modern times

the literary career of friedrich nietzsche 1844 1900 spanned less than twenty years but no area of intellectual inquiry was left untouched by his iconoclastic genius the philosopher who announced the death of god in the gay science 1882 and went on to challenge the christian code of morality in beyond good and evil 1886 grappled with the fundamental issues of the human condition in his own intense autobiography ecce homo 1888 most notorious of all perhaps his idea of the triumphantly transgressive übermann superman is developed in the extreme yet poetic words of thus spake zarathustra 1883 92 whether addressing conventional western philosophy or breaking new ground nietzsche vastly extended the boundaries of nineteenth century thought

the nietzsche disappointment examines the workings of time in nietzsche s philosophy it asks how he explains the great changes that according to him turned the past into the present catastrophic transformations of morality language human nature or that may yet make a desirable future out of this sorry present age the question is essential nietzsche attacks morality by appeal to the past and future where philosophy had fancied itself eternal imagining all times to be more or less like the present nietzsche sets the subject in motion with his attention to abrupt utterly consequential events everything eternal becomes temporal but after whetting his readers appetites for past and future cataclysms nietzsche makes them seem impossible birth of tragedy raises the question of where socrates could have come from and then can t answer in beyond good and evil nietzsche pins his hopes on the birth of future

philosophers even as he shows how many obstacles prevent their being born on the genealogy of morals posits occurrences like the triumph of slave morality that violate nietzsche s own claims about what can happen what stops nietzsche from telling the very stories that he wanted philosophy to attend to perhaps that question can t be answered without considering how nietzsche understands his own place in the flow of time considering for instance his wish to be an original philosopher the nietzsche disappointment is both critical and sympathetic it interrogates nietzsche in terms that he should understand it closes by asking whether there is some way of being critical that is also self critical for then a good reading may free the reader from nietzsche s person while continuing to confront the challenge he bequeathed to philosophy
